Judge A. B. Evans opened the fall term of the Circuit Court here Thursday. The docket was called, and the case of Julius Burton Bendall vs. Charles A. No place in the South offers superior advantages to the investor, the manufacturer, or as a place of residence. It is on two lines of railroad, the Chesapeake and Ohio and the Norfolk and Western, (S. V. R. R.) and the building of two others, the Baltimore and Ohio and Virginia Western, seems well assured. It has competing coal, is within easy distance of the New-River and Flattop Cokes; is at the gateway to the magnificent deposits of iron ores of the upper James; the limestone for the Roanoke furnace is mined here; it has glass-sand and sand for silica-brick and foundry purposes at its very door; in a word, is an ideal manusilica-brick and foundry purposes at its very door; in a word, is an ideal manufacturing site. It is in a healthful situation, amid the mountains, on the James river where it cuts across the Valley of Virginia, with a temperate climate free from the extreme heat of the further South and the severe winters of the North. Over \$175,000 worth of buildings will be under construction the day of sale; streets graded, water-works and sewerage provided for; electric-light plant under construction; the finest hotel in Virginia building, manufacturing plants going up, a \$50,000 steel railroad and highway bridge being erected to belt the town.
